MUKESH PATEL SCHOOL OF TECHNOLOGY MANAGEMENT & ENGINEERING

Krish Sandeep Parekh
BTECH Data Science 2021-2027
Date of Birth: 17-03-2005

Education

MPSTME, NMIMS University **2021 - 2027**
B. Tech Data Science
CGPA: 2.77
MPSTME, NMIMS University **2023 - 2024**
Diploma: 2.82
Bhavans A.H. Wadia High School **2020-2021**
SSC: 80%

Projects

Auto Generate promo Video - 2025
AI-Based Automated Video Generation Pipeline
Developed an end-to-end video processing system that converts long-form content into short promotional clips using scene detection and CNN-based segment scoring.
Automated video segmentation, ranking, and composition, reducing manual editing effort and enabling scalable content production.
Designed modular workflow for processing large video datasets efficiently and generating high-quality promotional outputs.

Real-Time Emotion Recognition Web App with AI Integration
Built a real-time facial emotion detection system using deep learning and computer vision techniques.
Integrated webcam-based input with a trained CNN model and deployed via a React frontend for low-latency browser-based inference.
Optimized model performance for real-time prediction, enabling seamless user interaction and accurate emotion classification.

The Unwind – AI-Based Student Wellbeing & Community Platform(Smart India Hackathon)
Developed a privacy-first wellbeing platform for students to manage study stress, plan schedules, and forecast mood.
Built a Study–Stress Balancer using KMeans clustering to classify user states and generate personalized 7-day plans.
Implemented mood forecasting using ARIMA (SARIMAX) with sleep and study patterns as inputs.
Designed FastAPI-based REST APIs and an interactive frontend (HTML, CSS, JS, Chart.js) for real-time insights.
Integrated SQLite (scalable to PostgreSQL) and added optional WebRTC-based community features (chat, voice, video).

Key Project Highlights

Built multiple AI-based applications focusing on real-world problems including automation, computer vision, and decision intelligence.
Demonstrated ability to design complete systems from data processing to frontend deployment.
Experience working under hackathon constraints, delivering functional prototypes within limited timeframes.

Certifications & Publications

Data Visualisation (Tata Forage,2025)
Completed the Tata data visualization empowering business with effective Insights Virtual Experience Program through Forage. Gained hands on experience in framing business problems building clear and impactful dashboards and communicating analytical insights to support data driven decision making. strengthened skills translating raw data into actionable business recommendation

MUKESH PATEL SCHOOL OF TECHNOLOGY MANAGEMENT & ENGINEERING

Krish Sandeep Parekh
BTECH Data Science 2021-2027
Date of Birth: 17-03-2005

Technical Skills

Programming: Python, C, C++
Libraries & Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Keras
Data & Visualization: Tableau, Power BI
Tools & Platforms: Git, GitHub, Docker (Basics), n8n Automation
Domains: Machine Learning, Deep Learning, Computer Vision, Data Analysis

Soft Skills

Problem Solving, Analytical Thinking, Team Collaboration, Rapid Prototyping

Achievements and Positions of Responsibility

- **Team Lead – Ace Hackathon, 2025**
  Led a team in building a real-time emotion recognition web application using deep learning for facial expression analysis. Designed and implemented the ML inference pipeline, integrated webcam-based image capture with a trained CNN model, and connected it to a React frontend for low-latency browser-based emotion classification. Delivered a functional end-to-end prototype within hackathon constraints.
- **National Level Bronze Medalist – Karate (Kata), Karnataka**
  Secured 3rd place in the Kata category at the Open Karate Championship at Karnataka State held in Kundapura on 14,15,16 November 2014.
